DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a motor vehicle, classified in class 280, subclass 156.
 - II. Claims 13-17, drawn to a step, classified in class 280, subclass 163.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claims 13-17 are an evidence claim, which indicates that the subcombination does not rely upon the specific detail of the combination of the claims 1-12 for its patentability. The subcombination has separate utility such as a step could be used on structural components such as door, trailer.
2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. Jeffrey Doyle on 2/18/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
